

# FIRE ELEMENT THE WIZARD AND SOCIALIZER/MARKETING

## 01

Fire Element Chinese 5 Elements. Fire is yang/masculine in character, its direction is upward and its energy is expansive. In Chinese thought Fire is associated with the qualities of dynamism, strength and persistence; however, it is also connected to restlessness. The fire element provides, warmth, enthusiasm and creativity, however an excess of it can bring aggression, impatience and impulsive behavior. In the same way, fire provides heat and warmth, however an

excess can also burn. Fire is the Element responsible for the passionate resonance when you are following your life's calling. It is the joy and laughter associated with playfulness. Fire type people are charming, fun, mischievous, easily excitable, and change emotional states rapidly. They love change, bright colors and environments that stimulate. The negative emotion is hate, while its positive emotion is joy.

## 02

A Fire-type person is courteous, eloquent, polite and expressive. They are good at compliments in speech.

Fire people are energetic, artistic, passionate, easily excitable, and have a tendency to rapidly change emotional states as well as become aggressive. They love sensation, drama and sentiment. They seek joy, gratification and the attention of others. They like to be invited to a party and dislike being alone.

People lacking Fire are aggressive but have no persistence. They are inclined to have little confidence and have plenty of worries.
